CADDY - ARM & VEST FOR STARGUN LINK/SOLO

Product code 97800193

WEIGHT REMOVAL

CADDY ARM & VEST is the solution designed by Ritmo for those who use welding extruders continuously. Thanks to a cushioning articulated arm, CADDY enables complex and fluid operator movements with the minimum effort. It can be used with Link and Solo series.

Two technical solutions are offered as standard.

A moving platform on which the cushioned system is installed. It is height-adjustable over one metre and enables both horizontal and vertical welding.

A vest for the operator that enables free movement with the stabilized arm

Weight vest	3,6 kg
Weight stabilized arm	2,4 Kg
Weight collar for Link	1 Kg
Weight collar for Solo	0,6 Kg
Weight stabilized platform	63 Kg
Total weight KIT	70,6 Kg
Dimensions stabilized base plate	700 x 700 x 1570 mm
Height-adjustability on stabilized base plate	1 m

ADVANTAGE RITMO

RITMO WORLDWIDE

Ritmo has professional distributors and resellers all over the world. Our staff is ready to assist you in English, Spanish, French, German, Arab, Italian, Russian and Portuguese.

TRAINING

From many years now, we have decided that the best way to grant a client/distributor a perfect knowledge of our products is to invest in custom training, in our own premises. These courses are aimed to teach how to operate the products in the best way, and how to supply the "first aid" when necessary.

PRESALES TECHNICAL ASSISTANCE

When a client or a potential client wants to buy us a product, it is our standard procedure to help find the best solution to its needs.

GLOBAL ADVICE

In such a technical field as ours, the customer requires the best assistance. Thanks to the experience developed along the years, and to the co-operation with several manufacturers, institutions, schools and training institutes, RITMO is able to give the most comprehensive advice to no matter which related issue. Our company is a long-time member of a UNIPLAST's (UNI-Italian National Plastics Standards Body) working group dedicated to the study and draw up of new standards within our field. The importance of this group is linked to the fact that the expansion of the plastic welding field ought to be followed by a crescent sensitivity for safety issues, so to have a sustainable and continuous growth. The working group prepares draws, hence present them to the UNI to be discussed and eventually transformed into new standards.

AFTER SALES TECHNICAL ASSISTANCE

Ritmo's Service Centre can solve all kind of technical issues, as well as overhaul our machines. Ritmo has other Service Centres abroad, linked to its official distributors.

STARTING AND TESTING

RITMO' technicians are prepared to make the starting and testing of workshop machines at the client' own premises, so that the fittings production can start almost immediately.
